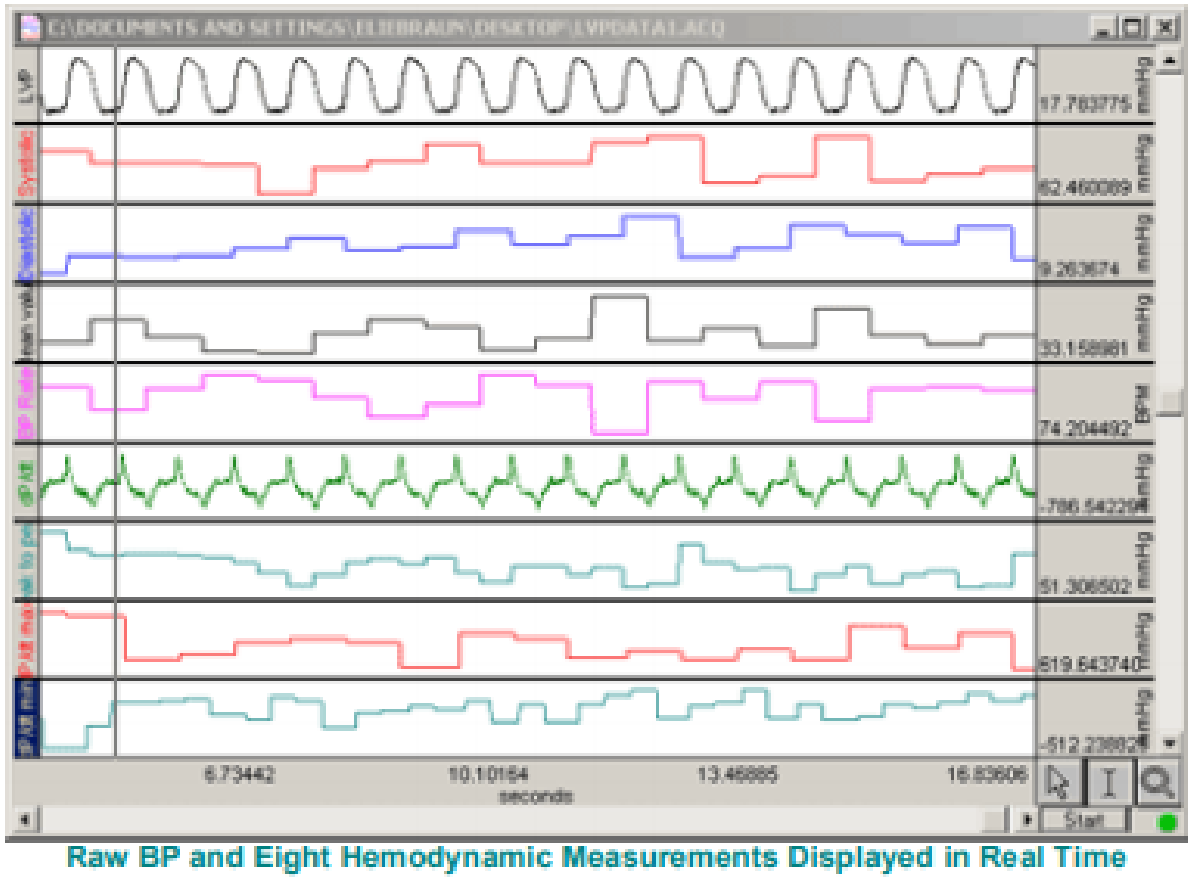
# Análises Hemodinâmicas

## Hemodynamic Measurements



Raw BP and Eight Hemodynamic Measurements Displayed in Real Time

In addition to basic blood pressure measurements such as Systolic, Diastolic, Mean and Rate, Acq*Knowledge* supports the extraction of a number of hemodynamic measurements. These measurements can be performed during acquisition (on-line) or post-acquisition (off-line).

The following eight parameters can be extracted from one arterial pressure input signal.

- Systolic Blood Pressure
- Diastolic Blood Pressure
- Mean Blood Pressure
- Heart Rate (in BPM)
- Derivative of Raw Blood Pressure (dP/dt)
- Diastolic to Systolic Delta Pressure (Pk-Pk)
- Maximum of dP/dt
- Minimum of dP/dt
